PREFACE *xiii*

| | | |
|----------|---|-----------|
| 1 | <i>Difference Equations</i> | <i>1</i> |
| 1.1. | First-Order Difference Equations | 1 |
| 1.2. | n -th-Order Difference Equations | 7 |
| | APPENDIX 1.A. Proofs of Chapter 1 Propositions | <i>21</i> |
| | References | <i>24</i> |

| | | |
|----------|--|-----------|
| 2 | <i>Lag Operators</i> | <i>25</i> |
| 2.1. | Introduction | 25 |
| 2.2. | First-Order Difference Equations | 27 |
| 2.3. | Second-Order Difference Equations | 29 |
| 2.4. | p -th-Order Difference Equations | 33 |
| 2.5. | Initial Conditions and Unbounded Sequences | 36 |
| | References | <i>42</i> |

| | | |
|----------|---|-----------|
| 3 | <i>Stationary ARMA Processes</i> | <i>43</i> |
| 3.1. | Expectations, Stationarity, and Ergodicity | 43 |
| 3.2. | White Noise | 47 |
| 3.3. | Moving Average Processes | 48 |
| 3.4. | Autoregressive Processes | 53 |
| 3.5. | Mixed Autoregressive Moving Average Processes | 59 |

- 3.6. The Autocovariance-Generating Function 61
- 3.7. Invertibility 64

APPENDIX 3. *A. Convergence Results for Infinite-Order Moving Average Processes* 69
Exercises 70 *References* 71

4 *Forecasting* 72

- 4.1. Principles of Forecasting 72
- 4.2. Forecasts Based on an Infinite Number of Observations 77
- 4.3. Forecasts Based on a Finite Number of Observations 85
- 4.4. The Triangular Factorization of a Positive Definite Symmetric Matrix 87
- 4.5. Updating a Linear Projection 92
- 4.6. Optimal Forecasts for Gaussian Processes 100
- 4.7. Sums of *ARMA* Processes 102
- 4.8. Wold's Decomposition and the Box-Jenkins Modeling Philosophy 108

APPENDIX 4.A. *Parallel Between OLS Regression and Linear Projection* 113

APPENDIX 4.B. *Triangular Factorization of the Covariance Matrix for an MA(1) Process* 114
Exercises 115 *References* 116

Maximum Likelihood Estimation 117

- 5.1. Introduction 117
- 5.2. The Likelihood Function for a Gaussian *AR(1)* Process 118
- 5.3. The Likelihood Function for a Gaussian *AR(p)* Process 123
- 5.4. The Likelihood Function for a Gaussian *AR(1)* Process 127
- 5.5. The Likelihood Function for a Gaussian *MA(q)* Process 130
- 5.6. The Likelihood Function for a Gaussian *ARMA(p, q)* Process 132
- 5.7. Numerical Optimization 133

| | | |
|------|---|-----|
| 5.8. | Statistical Inference with Maximum Likelihood Estimation | 142 |
| 5.9. | Inequality Constraints | 146 |
| | APPENDIX 5. A. Proofs of Chapter 5 Propositions | 148 |
| | <i>Exercises</i> | 150 |
| | <i>References</i> | 150 |
| 6 | <i>Spectral Analysis</i> | 152 |
| 6.1. | The Population Spectrum | 152 |
| 6.2. | The Sample Periodogram | 158 |
| 6.3. | Estimating the Population Spectrum | 163 |
| 6.4. | Uses of Spectral Analysis | 167 |
| | APPENDIX 6. A. Proofs of Chapter 6 Propositions | 172 |
| | <i>Exercises</i> | 178 |
| | <i>References</i> | 178 |
| 7 | <i>Asymptotic Distribution Theory</i> | 180 |
| 7.1. | Review of Asymptotic Distribution Theory | 180 |
| 7.2. | Limit Theorems for Serially Dependent Observations | 186 |
| | APPENDIX 7. A. Proofs of Chapter 7 Propositions | 195 |
| | <i>Exercises</i> | 198 |
| | <i>References</i> | 199 |
| 8 | <i>Linear Regression Models</i> | 200 |
| 8.1. | Review of Ordinary Least Squares with Deterministic Regressors and i.i.d. Gaussian Disturbances | 200 |
| 8.2. | Ordinary Least Squares Under More General Conditions | 207 |
| 8.3. | Generalized Least Squares | 220 |
| | APPENDIX 8. A. Proofs of Chapter 8 Propositions | 228 |
| | <i>Exercises</i> | 230 |
| | <i>References</i> | 231 |
| 9 | <i>Linear Systems of Simultaneous Equations</i> | 233 |
| 9.1. | Simultaneous Equations Bias | 233 |
| 9.2. | Instrumental Variables and Two-Stage Least Squares | 238 |

- 9.3. Identification 243
- 9.4. Full-Information Maximum Likelihood Estimation 247
- 9.5. Estimation Based on the Reduced Form 250
- 9.6. Overview of Simultaneous Equations Bias 252

APPENDIX 9. A. *Proofs of Chapter 9 Proposition 253*
Exercise 255 References 256

10 *Covariance-Stationary Vector Processes* 257

- 10.1. Introduction to Vector Autoregressions 257
- 10.2. Autocovariances and Convergence Results for Vector Processes 261
- 10.3. The Autocovariance-Generating Function for Vector Processes 266
- 10.4. The Spectrum for Vector Processes 268
- 10.5. The Sample Mean of a Vector Process 279

APPENDIX 10. A. *Proofs of Chapter 10 Propositions 285*
Exercises 290 References 290

11 *Vector Autoregressions* 291

- 11.1. Maximum Likelihood Estimation and Hypothesis Testing for an Unrestricted Vector Autoregression 291
- 11.2. Bivariate Granger Causality Tests 302
- 11.3. Maximum Likelihood Estimation of Restricted Vector Autoregressions 309
- 11.4. The Impulse-Response Function 318
- 11.5. Variance Decomposition 323
- 11.6. Vector Autoregressions and Structural Econometric Models 324
- 11.7. Standard Errors for Impulse-Response Functions 336

APPENDIX 11.A. *Proofs of Chapter 11 Propositions 340*

APPENDIX 11.B. *Calculation of Analytic Derivatives 344*
Exercises 348 References 349

| | | |
|-------|--|-----|
| 12 | <i>Bayesian Analysis</i> | 351 |
| 12.1. | Introduction to Bayesian Analysis | 351 |
| 12.2. | Bayesian Analysis of Vector Autoregressions | 360 |
| 12.3. | Numerical Bayesian Methods | 362 |
| | APPENDIX 12. A. <i>Proofs of Chapter 12 Propositions</i> | 366 |
| | <i>Exercise</i> | 370 |
| | <i>References</i> | 370 |
| 13 | <i>The Kalman Filter</i> | 372 |
| 13.1. | The State-Space Representation of a Dynamic System | 372 |
| 13.2. | Derivation of the Kalman Filter | 377 |
| 13.3. | Forecasts Based on the State-Space Representation | 381 |
| 13.4. | Maximum Likelihood Estimation of Parameters | 385 |
| 13.5. | The Steady-State Kalman Filter | 389 |
| 13.6. | Smoothing | 394 |
| 13.7. | Statistical Inference with the Kalman Filter | 397 |
| 13.8. | Time-Varying Parameters | 399 |
| | APPENDIX 13. A. <i>Proofs of Chapter 13 Propositions</i> | 403 |
| | <i>Exercises</i> | 406 |
| | <i>References</i> | 407 |
| 14 | <i>Generalized Method of Moments</i> | 409 |
| 14.1. | Estimation by the Generalized Method of Moments | 409 |
| 14.2. | Examples | 415 |
| 14.3. | Extensions | 424 |
| 14.4. | <i>GMM</i> and Maximum Likelihood Estimation | 427 |
| | APPENDIX 14. A. <i>Proofs of Chapter 14 Propositions</i> | 431 |
| | <i>Exercise</i> | 432 |
| | <i>References</i> | 433 |
| 15 | <i>Models of Nonstationary Time Series</i> | 435 |
| 15.1. | Introduction | 435 |
| 15.2. | Why Linear Time Trends and Unit Roots? | 438 |

- 15.3. Comparison of Trend-Stationary and Unit Root Processes 438
- 15.4. The Meaning of Tests for Unit Roots 444
- 15.5. Other Approaches to Trended Time Series 447

APPENDIX 15.A. *Derivation of Selected Equations for Chapter 15* 451
References 452

16 *Processes with Deterministic Time Trends* 454

- 16.1. Asymptotic Distribution of *OLS* Estimates of the Simple Time Trend Model 454
- 16.2. Hypothesis Testing for the Simple Time Trend Model 461
- 16.3. Asymptotic Inference for an Autoregressive Process Around a Deterministic Time Trend 463

APPENDIX 16. A. *Derivation of Selected Equations for Chapter 16* 472
Exercises 474 *References* 474

YI Univariate Processes with Unit Roots 475

- 17.1. Introduction 475
- 17.2. Brownian Motion 477
- 17.3. The Functional Central Limit Theorem 479
- 17.4. Asymptotic Properties of a First-Order Autoregression when the True Coefficient Is Unity 486
- 17.5. Asymptotic Results for Unit Root Processes with General Serial Correlation 504
- 17.6. Phillips-Perron Tests for Unit Roots 506
- 17.7. Asymptotic Properties of a *p*th-Order Autoregression and the Augmented Dickey-Fuller Tests for Unit Roots 516
- 17.8. Other Approaches to Testing for Unit Roots 531
- 17.9. Bayesian Analysis and Unit Roots 532

APPENDIX 17.A. *Proofs of Chapter 17 Propositions* 534
Exercises 537 *References* 541

| | | |
|-------|---|-----|
| 18 | <i>Unit Roots in Multivariate Time Series</i> | 544 |
| 18.1. | Asymptotic Results for Nonstationary Vector Processes | 544 |
| 18.2. | Vector Autoregressions Containing Unit Roots | 549 |
| 18.3. | Spurious Regressions | 557 |
| | APPENDIX 18. A. <i>Proofs of Chapter 18 Propositions</i> | 562 |
| | <i>Exercises</i> | 568 |
| | <i>References</i> | 569 |
| 19 | <i>Cointegration</i> | 571 |
| 19.1. | Introduction | 571 |
| 19.2. | Testing the Null Hypothesis of No Cointegration | 582 |
| 19.3. | Testing Hypotheses About the Cointegrating Vector | 601 |
| | APPENDIX 19. A. <i>Proofs of Chapter 19 Propositions</i> | 618 |
| | <i>Exercises</i> | 625 |
| | <i>References</i> | 627 |
| 20 | <i>Full-Information Maximum Likelihood Analysis of Cointegrated Systems</i> | 630 |
| 20.1. | Canonical Correlation | 630 |
| 20.2. | Maximum Likelihood Estimation | 635 |
| 20.3. | Hypothesis Testing | 645 |
| 20.4. | Overview of Unit Roots—To Difference or Not to Difference? | 651 |
| | APPENDIX 20. A. <i>Proofs of Chapter 20 Propositions</i> | 653 |
| | <i>Exercises</i> | 655 |
| | <i>References</i> | 655 |
| 21 | <i>Time Series Models of Heteroskedasticity</i> | 657 |
| 21.1. | Autoregressive Conditional Heteroskedasticity (ARCH) | 657 |
| 21.2. | Extensions | 665 |
| | APPENDIX 21. A. <i>Derivation of Selected Equations for Chapter 21</i> | 673 |
| | <i>References</i> | 674 |
